Summary

Not sure if you want to pull the trigger on a mouse because you don't know if you like the shape? Try my megapack!

Tags: [photogrammetry](#) [scan](#) [replica](#) [mouse](#) [thingiverse](#)

Not sure if you want to pull the trigger on a mouse because you don't know if you like the shape? Well luckily this would be able to help you determine that! You can also change your infill percentages and get the same weight as the mice that you are testing if you have filament weight it set up in Cura.

Please consider tipping, as I hand-refine every scan to make sure they are up to my standards before uploading to the megapack, and they all take some time to add.

UPDATE - 2024/08/11 - Added Endgame Gear OP1we, Lamzu Thorn, Logitech G903, MX Ergo, Pulsar X2V2, Xlite V3, Vaxee XE, and Zowie U2

Index:

- Anker Wireless Vertical
- Apple Magic Mouse
- ASUS ROG Chakram Core [supports]

- ASUS ROG Gladius II [supports]
- ASUS ROG Keris
- ASUS ROG Pugio II
- ASUS ROG Strix Impact II
- ASUS ROG Spatha
- Cooler Master MM710
- Cooler Master MM720 / MM711
- Cooler Master MM730 / MM731

- Zowie ZA13-B

I am constantly adding new one-piece models of mice for people to print out and try, so if you want one to be added just comment on this post and I'll get to it when I can and respond when it's complete!

Print Settings

Supports: Check specific mouse model

Resolution: 0.1 recommended, or dynamic layers. Can use any layer height you choose.

Infill: Lightning infill, or at least 12% on other infills

Filament: Any

Notes:

Print with pretty much anything. Any file that says it needs to be printed with supports... you should do that.
